

Enova

The strength of simplicity

TORNVIG CHRISTENSEN
MASKINER A/S

Dear customer:

We are very proud of showing you our product catalogue, in which you can find the best solutions to organize and administrate offices, warehouses and workshops.

The products here offered are supported by an industrial organization that owns the most advanced technologies on design and production.

All raw materials used in our productive processes are manufactured and developed in the UE and they satisfy the most demanding quality regulations, calculation codes, they respect the environment and assure industrial safety.

The trust our customers have placed in us has allowed Esnova despite the economical crisis to experiment a significant increase of our annual turnover which evidences that is possible to compete in this business with products manufactured in Europe when we combined technology, innovation and service.

Our Account Managers are always at your disposal to establish a direct relationship, quicker and more efficient as these days require.

We hope that our products will be of your interest,

Sincerely,

A handwritten signature in black ink, appearing to read 'Marco Antonio Fernández Alonso'.

A two tier system shelving **Riveto 1**

- This storage system will take advantage of the existing vertical space in the warehouse by creating different shelving floors, which are connected among them by stairs and aisles.
- Modular system. There is the possibility to increase the installation sideways and in depth without no problem.
- It can be adapted to the available space.

Example

Floor area: 40 m.²
Height of the system: up to 4,8 m.
Warehousing area: 140 m.²

Pallet Racking

- It is the suitable system for the storage of palletized loads of multiple references.
- it allows the immediate access to all the units of load.
- Great resistance. Conventional Pallet Racking adapts to the storage need.

Custom made projects

Our Technical Department has the solution for any storage need.

Design and execution of special storage systems with the most advanced informatic programs.

Safety and Protection

ANTI-FALL MESH

Electrowelded mesh pannels are used as security closings in aisle or transit areas to avoid goods from falling.

Drive In

- Cost effective solution to high density storage.
- Significant feature is that up to 85% of the available space can be used.
- Appropriate system when loading large quantities of like-product.

It is a forklift guidance system that allows work in lanes with more than six meters depth and height.

Post Protector

It is important to protect the bottom of posts and frames.

Load Level Pallet Stopper

This element prevents the pallets from falling at the end of the aisle in a single entry type of drive-in.

Floor Level Pallet Stopper

This element works as an aisle end reference for the floor level in a single entry type of drive-in.

Pallet Entry Guide

This element makes easier the pallet entry and guidance on the aisle, avoiding falls or damage to the goods.

Cantilever Racking

- The main characteristic of the Cantilever Storage System is its capacity to support high volume and length loads.
- It can also be perfectly adapted to the different needs such as variable length and different heights loads. It allows as well to place levels at one or both sides of the central column and its assembly is simple.

Standard dimensions	
Column height (H*)	2500-3000-3500-4000-4500-5000-5500-6000-6500-7000
Arm length (L*)	600-800-1000-1250-1500

* Measures in mm.

Light Cantilever

- A system for storing **light loads** of great lengths or volumes.

Single Frame

Double Frame

Standard dimensions

Column height (H*)	400-500-600-700-800-900-1000-2000-2500-2900
Arm length (L*)	70-80-90-100-120-150-180

* Measures in mm.

Vertical Storage Cantilever

- Storage system designed for long loads or big volume ones in a **vertical** disposition.

The arrangement of the spacer arms can be adjusted to the client's necessities.

Shuttle Cart

- The main feature of our Shuttle Car System is to facilitate and improve the loading and unloading of goods, without the need for trucks to access the storage aisles.
- The shuttle car runs on rails, selecting input and output pallets via a remote control.

ASK FOR OUR
PRODUCT
CATALOGUE

Pallet live storage

- Flow racking systems for boxes or pallets.
- Sloped roller truck beds for a perfect motion of the pallets.

Mobile pallet racking

- High storage density.
- The Pallet racking is fitted on rail-guided mobile bases.
- Optimal for high floor prices.
- Perfect for cold storage systems.

Mezzanine floor

- Maximum advantage of warehouse free area, doubling or tripling the surface area.
- Mezzanine floors may be use with elevating systems which enable goods accesability.

CUSTOM
MADE
PROJECTS

Automated Storage Systems

Manage your warehouse on an automated way and optimize the storage, the picking processes and the shipping of your goods.

Maximum stock control, speed up your picking processes and higher efficacy in the inbound and outbound of goods.

Rack Clad Building

- Warehousing solution where shelving conform the building itself, without construction works.
- Created to store in height, being able to overtake 30 m.
- The elements of the system together with the enclosures of the building make up a compact block that allow the automation of the storage processes.

CUSTOM
MADE
PROJECTS

Esnova incorporates to its product range a new software tool to manage our storehouses in a comfortable, easy and profitable way.

Esnova Software is the warehouse management tool that optimizes all processes (reception, order preparation, shipping), reducing costs and improving the service quality. It is based in an effective and easy managing for any user.

= + **EFFICIENT
INTUITIVE**

**THE BRAIN OF YOUR
WAREHOUSE**

It decreases up to 90% the risk of errors, resulting in a significant time and money saving.

It speeds up common procedures as reception, storing, order preparation and shipping.

It increases the storage profitability and allows control the existing stock in real time.

Esnova Software is designed to make its use easy and intuitive.

Is a custom-made tool, adaptable to the needs of each customer.

Better exploitation of the storage space and merchandise organization.

Accurate control of the tracking for the different references in the warehouse.

Using this tool you will be able to analyze your store's statistics, providing decision-making and increasing productivity.
